Thanks. Hopefully you'll also get some positive support in writing from DEP this week.

>>> "Vaughn, Stephanie" <Vaughn.Stephanie@epa.gov> 3/3/2014 8:54 AM >>>

Instead of the sentence starting "EPA stated they..." I would say "EPA has notified NJDEP that work to complete placement of the geotextile, armoring and sand layers recommenced the week of February 24th and, barring another extended extreme cold spell or technical difficulties, should be complete in April."

Stephanie,

I understand that your fish window discussions with DEP have produced some movement on their part. Not sure if any of that should be reflected in the minutes of the teleconference, but if so, please look at the attached draft minutes of last week's teleconference and modify the text as you deem appropriate before I send this out for wider distribution.

Thanks.

Stan
